

# VISIBLE AND INVISIBLE WOUNDS OF WAR

The vision of Wounded Warrior Project® (WWP) is to foster the most successful, well-adjusted generation of wounded, ill, and injured veterans in our nation's history. Every warrior's journey is unique, and WWP provides services, support, and interventions to address needs, nurture strengths, and enhance quality of life through every step of that journey.

WWP is proud to support organizations that augment these efforts by providing innovative programs and services that support mental and brain health, physical fitness, and spiritual health. Though each program employs a unique model of care, they all share a holistic approach to WWP's fundamental objectives of preventing veteran suicide and maximizing quality of life for warriors and their families.
